

Counting to 5 - Seeing It Clearly!

When we start counting, we start with the number one. Counting is a way we put numbers in order to show larger values. Using the *MasterPieces*, we can see the 2-bar comes next in the order of numbers. Therefore, the 2-bar is the next number. Then, we can see the 3-bar comes next, and then the 4-bar followed by the 5-bar.
