

Telling Time Cards & Games

These flashcards are held in copyright by Perceptions Math. All rights reserved.

These cards may be reproduced for use by one teacher in one classroom.

In these flash cards, you will find *Analog Manipulative Clocks*, *Analog Clocks*, *Digital Clocks*, and *Times Written in Words*. You will also find *Response Cards* that elicit an answer from your students. Example: "On school days, I eat lunch at"

Advanced Cards have been included which ask your students to add or subtract time. Example: "If we add fifteen minutes, it will be"

Cards for *a.m.* and *p.m.* are included to use with the *Response Cards* and *Advanced Cards*. There are blank cards for you or your student to create additional cards.

The file is divided into two sections to help when you print the cards. The first section has colored cards which should be run through a color printer, and the second section has black and white cards which can be run on any printer. The cards are all one-sided, so there is no need to duplex them.

* **Please Remember** to use card stock in order to have your cards last as long as possible.

Note: A variety of *Times Written in Words Cards* have been included. Please pick the ones you wish your student to learn as there are a variety of ways different times can be said.

Examples: 1:05 could be stated "five past one" or since we are now in a digital world, it could be stated as "one o'five"

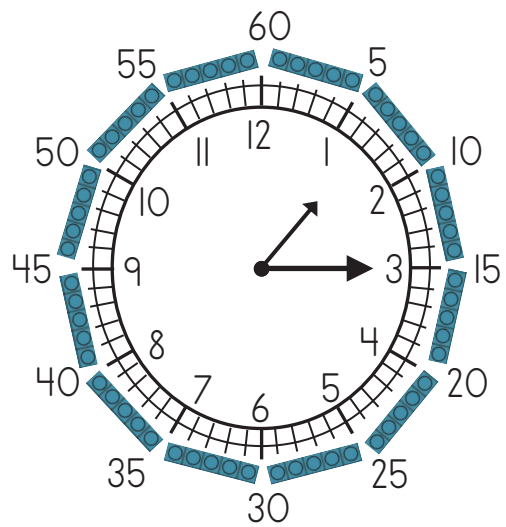

3:45 could be stated as "three forty-five" or "quarter to four"

Activities & Games:

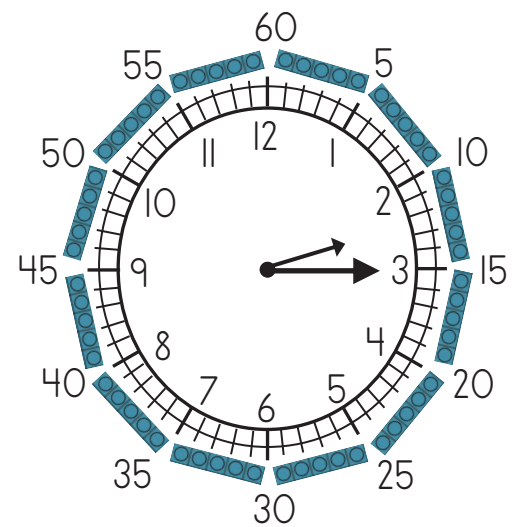

- Your students may match any combination of the basic sets listed above.
- You may play a traditional game of Memory. (Depending on skill level, please choose two sets of cards to use making sure that no more than 15 matching card sets are out at a time unless your students are advanced. You do not want to overwhelm your students.)
- Depending on each student's skill level, you may have them work individually, in pairs, or in groups on the *Advanced Cards*.

Feel free to come up with your own games for your students or allow them to be creative and make up games for themselves.

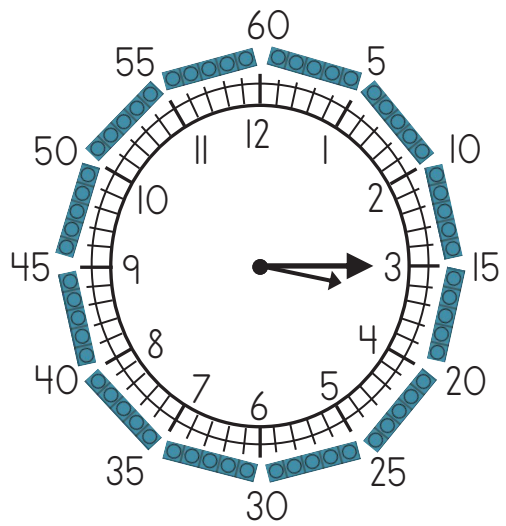

Should you have any questions, please feel free to contact us!
